M.J.P.R University Bareilly (U.P)

## Project Details

---

**Fintech Project (Paywhoo) :** - In my fintech project, I'm deeply immersed in the dynamic intersection of finance and technology. Our endeavor focuses on revolutionizing traditional financial services through cutting-edge technological solutions. From developing secure and efficient backend systems to crafting intuitive user interfaces using frameworks like Angular.js, our goal is to enhance accessibility, transparency, and efficiency in financial transactions. By leveraging innovative technologies and adhering to rigorous security standards Technologies :- (Angular , Laravel )

**Field Service Management (FSM):-** In Field Service Management (FSM), I oversee resource allocation and coordination for efficient customer service. Leveraging advanced technology and streamlined processes, we aim to minimize response times and enhance workforce productivity. Our solutions empower field technicians with real-time data access and intelligent scheduling, ensuring seamless communication and task execution to elevate service delivery standard. Technologies :- (Vue.js , Laravel)

**Api Testing:** - Proficient in designing comprehensive test suites to validate API functionality, security, and performance across various endpoints and scenarios.

**Website Developments:** - We have successfully developed 50+ an informative and visually engaging website that serves both eco-awareness and e-commerce needs, providing valuable resources while also offering a seamless shopping experience for environmentally conscious consumers. (Wordpress, Shopify, Php)
